

That's me in A Spaceship

I took a ride in a spaceship
It's not what I wanted
it's not what I'd planned

Was sneaking in there discretely
Hoped that nobody sees me
Except for the hands

That's me in a spaceship
I went up there alone

And the hands they were joking
I was only hoping
To get down alive

First they're pulling me up
Then they're leaving me hanging
Then they're letting me down

And the stage hands are speeding
And my heart it was beating
Beating like a fat double time drum

It's me riding a spaceship
It was less than half a day trip
And there was
Not a lot of space

And when I land they pull me out
And dropped me down into a water tub
With not a lot of space

Feeling like a frog, dripping like a beaver
Shaking like a dog, like I had a fever
Is it gonna carry me all the way?

Part of me did for a little money

Part of me thought it was funny
Part of me liked the applause

That's me in a spaceship
I never had to pay

Cannot brag about great height
It just hit in with stage fright
And I never look down

Listen to the styrofoam it is grumbling
Clinging to the metal pole and I'm mumbling
Silent prayers to myself

It's me riding a spaceship
It was less than half a day trip
And there was
Not a lot of space

And when I land they pull me out
And dropped me down into a water tub
With not a lot of space

They pulled me to my feet
And rubbed me dry, gave me to eat
All at one time
But not a lot of space

It's me riding a spaceship
It was less than half a day trip
And there was
Not a lot of space
