

Party People

We sit in silence, stare at candlelight
We don't talk much, when our tongues are tied
Pouring another drink and pass it on to you
We feel like party people, party people do

It's time to quit now, we've been here for a while
We put our coats on, we yawn out a smile
It's true we can't lift our feet
Cause the beats bounce off our shoes
We feel like party people, party people do

We party all night through
And we party like there was
No tomorrow
